Jacksonville, FL

## Technical Skills

- **Programming Languages:**  
JavaScript | TypeScript | Node.js | HTML | CSS
- **UI Development & Web Technologies:**  
Angular 2+ | React | jQuery | Bootstrap | Nest.js | Express.js | MongoDB | JSON | XML | AJAX | GraphQL | Postman
- **Database Technology:**  
MongoDB | Firebase
- **Testing Tools:**  
Jasmine | Karma
- **Version Control/ Management:** Git | GitBash | JIRA | Visual Studio Code
- **Development Methodologies:**  
SCRUM | Agile
- **Soft Skills:**  
Problem Solving | Time-Management | Verbal Communication | Adaptability | Self-Sufficient | Troubleshooting | Conflict Management | Self-Motivation | Decision Making | Collaborative | Empathy | Dedication | Discipline

## Summary & Projects

### Qualifications

- Over 3+ years of extensive experience as a frontend web developer.
- Proficient in designing and developing complex web applications using HTML5, CSS3, JavaScript, ES6, Angular 2+, TypeScript, jQuery, AJAX, JSON, and XML.
- Solid understanding of Angular and its abundance of features.
- Adept knowledge with CSS/CSS3 features, and ng-Bootstrap.
- Ability to construct User Interfaces using a plethora of libraries; all while focusing on SEO and accessibility.
- Proficient in version control systems like Git, and GitHub.
- Experienced fetching data from APIs utilizing Restful or GraphQL.
- Knowledgeable about database technologies such as MongoDB and Firebase.
- Solid understanding of implementing CRUD operations within projects with Node.js/Express.js or NestJS framework.
- Capable of building applications utilizing Full Stack technologies.
- Experienced utilizing Agile/Scrum methodologies in all phases of the software development life cycle.
- Broad experience performing unit tests by creating test cases using test runners such as Jasmine and Karma.
- Self-driven to continuously improve skills, and digest technologies such as React and Firebase.

### Development Experience

#### Freelance Opportunities, Remote

July, 2022 - Current

#### Full Stack Angular Development

##### Feluxurious Ecommerce Store:

- Creating a personalized ecommerce store for a small business owner to showcase and sell their products. Constructing the User Interface utilizing Angular 15+ , CSS, and Angular Material. Collaborating to create APIs, and the server side functionality using the Django framework.
- <https://github.com/KingDrahggo/eCommerce>

##### Service Connect Application:

- Service Connect is a platform that will house a plethora of services from babysitting to plumbing to give customers a seamless experience when requiring the talents of specific professionals. Creating the User Interface using Angular 14+, CSS, Angular Material or Tailwind. Collaborating to create APIs and server side functionality using Nest.js Framework; as well as connecting to a MongoDB database.
- <https://github.com/Johnathan238/Service-Connect>

#### Antra.Inc, Remote

July, 2022 - July 2023

#### Full Stack Angular Development

## Projects

<https://webdevgreg.com/>
- **Service Connect Application:**  
<https://github.com/Johnathan238/Service-Connect>
- **Feluxurious Ecommerce Store::**  
<https://github.com/KingDrahggo/eCommerce>
- **React Tic-Tac-Toe:**  
<https://github.com/KingDrahggo/tictactoereact>
- **Full Stack Todo List:**  
<https://github.com/KingDrahggo/ToDo-List-Mean>
- **Akira Movie App:**  
<https://github.com/KingDrahggo/Akira-Movie-App/tree/main>
- **Capstone Project:**  
<https://github.com/KingDrahggo/capstone-trivia>
- **Pig Latin/ Unit Testing:**  
<https://github.com/KingDrahggo/piglatin-unittesting>
- **Geolocation API/ Image Retrieval:**  
<https://github.com/KingDrahggo/geolocation-api/tree/project>

### Responsibilities:

- Partook in daily scrum meetings to elevate our marketability by discussing industry leading technologies, and framework updates.
- Collaborated as a small team of three developers to build Full-Stack Applications to develop our skills.
- Displayed the ability to proficiently use Angular 2+ framework to build scalable UI components.
- Utilized Node.js/ Express.js to facilitate the integration of CRUD operations between Angular and MongoDB.
- Connected the Server to MongoDB via the Mongoose Library.
- Implemented Unit Testing using Jasmine as the framework, and Karma as the test runner.
- Facilitated ticket distribution using JIRA; allowing us to push feature branches to the main branch in two week cycles.
- Git and Github were utilized to handle version control.
- Focused heavily on implementing ngRx and RxJs libraries when handling data and state changes.
- Handled styling the UI components primarily with ng-Bootstrap, vanilla CSS, or Angular Material.
- Deployed a fully functional Full-Stack movie site application allowing separate access to User and Admin.

### Kenzie Academy, Remote

February 2021 - August 2021

### Associate Front-End Web Development | Project Based Training

### Responsibilities:

- Focused on grasping core knowledge of primary web based programming languages such as Javascript, HTML, CSS.
- Implemented code utilizing functional programming and object oriented programming skills.
- Displayed proficient use of core programming practices, enabling for swift pick up of other technologies.
- Honed team oriented soft skills to produce code efficiently, and neatly.
- Developed and deployed a web application dedicated to showcasing different programming concepts using Javascript, HTML, CSS, and JQuery.
- Constructed and designed an trivia quiz application utilizing the JService API, which allowed the user to take part in a randomized quiz that tracked the users score, and reset the game on a loss.
- Intuitively figured out a way to transform common words into Pig Latin versions of themselves; utilizing a plethora of array methods, and starting the development process with Test Driven Development.
- Built an application which retrieves 5 images based on users location. The user has to click the provided button to toggle through the 5 images; they are then instructed to restart the retrieval process.
- Displayed proficient knowledge of Javascript by creating a Tic-Tac-Toe application utilizing the React Framework.
